SrujanaBuddy

REVA University's AI Coaching Companion

A Leadership Demonstration

May 14, 2026 · First Floor Boardroom, Admin Block

Augmenting Faculty Mentoring at Scale

Agenda

Time	Session
15 min	Software 3.0 & Agent Skills — The Revolution in Plain Language
5 min	SrujanaBuddy — Architecture & Coach Identity
15 min	Live Demo — Student Experience Walkthrough
15 min	Feedback & Q&A
10 min	Action Planning — Beta Testers & Next Steps

You choose which demo scenarios to see — pick from 10 real student situations.

Part 1: Software 3.0 & Agent Skills

The Revolution — In Plain Language

For non-technical leadership: what changed, and why it matters now

How Software Evolved

timeline title The Evolution of Software 1960 onwards : Software 1.0 — Rule-Based : Programmer writes every instruction : Rigid. Predictable. No judgement. 2010 onwards : Software 2.0 — Learning from Data : Neural networks trained on examples : Flexible patterns. Still no language. 2025 onwards : Software 3.0 — Language-First Intelligence : You describe what you want in plain language : AI reasons, plans, and acts

We moved from "tell the computer every step" to "describe the goal and the AI figures out the steps."

The Analogy — In Simple Terms

graph LR A["📄 Software 1.0\nPrinted Procedure Manual\nFollow exact steps only"] --> B["🎓 Software 2.0\nLearned by Example\nShowed 10,000 cases; found patterns"] --> C["🧠 Software 3.0\nExpert Consultant\nDescribe the problem.\nThey figure out the approach."]

```
style A fill:#ffcdd2,stroke:#c62828,color:#000
style B fill:#fff9c4,stroke:#f9a825,color:#000
style C fill:#c8e6c9,stroke:#2e7d32,color:#000
```

The shift:

- **Old:** You tell the computer every step. It breaks if one step changes.
- **New:** You describe intent. The AI reasons. It adapts.

What Are "Agent Skills"?

flowchart TB subgraph AI["🧠 Large Language Model (The Brain)"] direction TB LLM["Reasoning Engine\nUnderstands language, context, intent"] end

```
subgraph SKILL["📋 Agent Skill (The Role)"]
  direction TB
  S1["Identity: Who am I?"]
  S2["Rules: How do I behave?"]
  S3["Tools: What can I use?"]
  S4["Domain: What do I know?"]
end

subgraph ACTION["⚡ Output"]
  O1["Coaching conversation"]
  O2["Document review"]
  O3["Task planning"]
  O4["Data analysis"]
end

SKILL --> AI --> ACTION
```

An Agent Skill = Instructions that give the AI a specific role, domain knowledge, and

One Model. Infinite Specialists.

 INFOGRAPHIC PLACEHOLDER: Show one brain → 15 specialist hats (coach, auditor, researcher, admin, mentor...)

Why this is revolutionary:

- **No new software** to install or maintain
- **No new servers** — runs in the tools you already use (GitHub Copilot, VS Code, Gemini)
- **Instantly update** expertise by editing a text file
- **Any domain** — the same approach works for coaching, legal review, research, admin

You are not buying software. You are writing role descriptions for an AI that already exists.

T.R.A.C.K — Automation Across REVA

mindmap root((T.R.A.C.K)) T[Teaching & Learning] Course coaching for each subject Exam prep and study plans Learning-to-learn coaching Anti-brain-rot guardrails R[Research] PhD scholar guidance Literature review assistant Materials synthesis protocols Publication planning A[Administration] MOU review with legal checks AAA Audit document review NAAC evidence collection Faculty coordination C[Consulting & Products] Startup mentoring Industry project coaching Portfolio and competency building GCS gamification engine K[Kaizen] Weekly review protocols Faculty mentoring insights Continuous improvement loops Early warning dashboards

T.R.A.C.K — Real Examples Today

Domain	What an Agent Skill Can Do
Teaching (T)	Coach a student through exam panic at 11pm — no faculty needed
Research (R)	Guide a PhD scholar on materials synthesis from published papers
Administration (A)	Review an MOU against REVA's legal checklist — flag gaps instantly
Consulting (C)	Score a student's startup idea across 6 Enterprising dimensions
Kaizen (K)	Run weekly coaching reviews and flag at-risk students to faculty

 MEME PLACEHOLDER: "It's not about replacing faculty — it's about giving faculty superpowers." (Suggest: Professor with Iron Man suit)

The Key Insight for Leadership

flowchart LR A[" Old Model\n1 Faculty : 60 Students\nPersonalized guidance = impossible"] --> B[" New Model\n1 Faculty + SrujanaBuddy\n= 1 Faculty : 60 Students\nwith personalized coaching at scale"]

```
style A fill:#ffcdd2,stroke:#c62828,color:#000
style B fill:#c8e6c9,stroke:#2e7d32,color:#000
```

SrujanaBuddy is not a chatbot.

It is a **coaching operating system** — 160 files, 15,000 lines of REVA-specific coaching intelligence — built on Agent Skills technology.

The same platform that can coach students can review MOUs, guide PhD research, support NAAC audits, and run Kaizen reviews. Same technology. Different skill files.

Part 2: SrujanaBuddy

Architecture & Coach Identity

What Is SrujanaBuddy?

graph TB SB["SrujanaBuddy\nAI Coaching Companion\nfor REVA Students"]

```
SB --> C1["📖 Shiksha\nAcademic Coaching\nSubject mastery, exam prep"]

```

15 Specialist Agents

#	Agent	Who It Serves
1	Academic Learning Coach	Study strategy, subject mastery
2	Course Buddy (per subject)	Per-course deep coaching
3	Assessment & Competition Coach	Exams, hackathons, competitions
4–5	Accountability + GTD Partner	Daily/weekly execution discipline
6	Inner Mastery Coach	Focus, discipline, dopamine regulation
7	Integral Life Coach	Whole-person balance
8	Career & Pathway Coach	Job/internship/GATE/startup direction
9	Competency & Portfolio Coach	Portfolio for placements and admissions
10	Out-of-Curriculum Coach	Certifications, personal projects
11	Enterprising Skills Mentor	GCS, startup ideas, venture readiness
12–15	Support, Faculty Coord, History, Website	Safety, escalation, evidence, presence

The Srujana Pathway

graph LR S1["🌱 Stage 1\nFoundation\nStudy habits · GTD\nCampus integration\nYear 1"] S2["🔨 Stage 2\nApplication\nIndustry projects\nInternships · Skills\nYear 2–3"] S3["🔧 Stage 3\nCreation\nProducts · Papers\nPortfolio · GCS\nYear 3–4"] S4["🚀 Stage 4\nEnterprise\nVentures · Research\nImpact · Leadership\nFinal / PG"]

```

```

```
style S1 fill:#e3f2fd,stroke:#1976d2,color:#000
style S2 fill:#e8f5e9,stroke:#388e3c,color:#000
style S3 fill:#fff9c4,stroke:#f9a825,color:#000
style S4 fill:#fce4ec,stroke:#c62828,color:#000
```

Readiness-based progression, not semester-gated. Evidence-first.

Part 3: Live Demo

10 Student Scenarios — You Choose

Select any scenario below. We will walk through it live.

Choose Your Demo

#	Student	Situation	What You'll See
1	Riya — 1st yr CSE	Exam panic, blank brain	Wellbeing triage · Calm Queen reset
2	Arjun — 3rd yr CSE	AI vs Startup dilemma	Career coaching · Svadharma discovery
3	Keerthi — 2nd yr ECE	Wants to learn ML	Out-of-curriculum coach · AI pathways
4	Vikram — 4th yr CSE	Placement panic, weak portfolio	Portfolio rescue · 6-week plan
5	Sneha — MBA 1	"I don't know my strengths"	Five Spheres · strengths discovery
6	Rohit — 3rd yr ISE	Personal website, paralysed	Personal website agent · step-by-step
7	Ananya — 3rd yr CSE	Startup idea → GCS score	Enterprising mentor · 6-dim GCS score
8	Faizan — 1st yr Mech	Missed 3 weeks, family crisis	Wellbeing first · academic re-entry
9	Priya — 4th yr CSE	GATE + PhD ambition	Research pathway · GATE 2027 plan
10	Suresh — 2nd yr Civil	Wrong branch, demotivated	Svadharma navigator · pivot framing

Demo A — Wellbeing First: Riya's Story

1st Year · Exam Week · 3/10 energy · 2 days no sleep

 Riya: "hi i dont know what to do i have 3 exams in 2 days and i cant study anything my brain is just blank"

 SrujanaBuddy: "Aye Riya, seri — I hear you, da. Blank brain during exam week is the worst feeling, no? Before we do anything else — quick check-in first. On a scale of 1 to 10, how are you feeling right now?"

What happened:

-  Wellbeing check BEFORE any study plan
-  Calm Queen Reset (4-4-6 breathing)
-  3-subject priority triage → 2-hour micro-plan
-  Session close with anonymized log consent

Faculty insight: Student reached out at 10 PM. No faculty available. SrujanaBuddy held the space.

Demo B — Career Clarity: Arjun's Dilemma

3rd Year · AI/ML track vs co-founding a startup

 Arjun: "i like AI and i've been doing some ML projects but my friend wants me to co-found a startup... i honestly don't know which is better"

 SrujanaBuddy: "Arjun, this is actually a really good problem to have — it means you have options. Most 3rd years are still figuring out what they even want. So respect, da. When you were doing those ML projects — what was the feeling? 'I love this work itself' or 'I love what I can build with this'?"

The outcome: Arjun realized his answers pointed to the startup — and the startup was in AI. The paths weren't in conflict. He needed to see it clearly.

Socratic coaching — SrujanaBuddy never told him the answer. He found it himself.

Demo C — Portfolio Rescue: Vikram's 6-Week Plan

4th Year · Placements in 6 weeks · 7 GitHub projects, 5 unfinished

 SrujanaBuddy: "Let me give you the honest portfolio audit: Current state: 7 projects, 2 usable, 5 dead weight. Target state in 6 weeks: 3 strong projects + 1 standout you can talk about for 15 minutes. Your bottleneck is not CGPA — it's projects + communication. That's fixable."

6-week rescue plan generated:

- Week 1–2: Triage + polish one project
- Week 3–4: Build one focused new project
- Week 5: Practice interview narration
- Week 6: Mock interview dry run

IMAGE PLACEHOLDER: Before/after GitHub profile screenshot (mock-up)

Demo D — Startup & GCS Score: Ananya's Idea

3rd Year · Campus gig marketplace app · 30 student interviews done

GCS 6-Dimension Live Scoring:

Dimension	Ananya's Signal	Score
Problem Intelligence	Two clear sub-problems identified	4/5
Solution Design	V1 scoped to 3 features only	4/5
Execution	30 interviews before building	5/5
Market Awareness	REVA-first, then expand	3/5
Team & Resources	Solo founder currently	2/5
Impact	Real student economic pain point	4/5

Coaching nudge: "Go to 5/5 on Problem Intelligence: quantify — '73% of students missed a job due to discovery lag.' That one number changes how people hear your pitch."

Demo E — Strengths Discovery: Sneha's Revelation

MBA 1st Year · "Everyone else knows what they want"

 SrujanaBuddy: "Sneha, you love *invisible architecture* — the systems behind the scenes that make things work. You're not doing it for recognition. You're doing it for the satisfaction of the system working. That's operations intelligence + process design + systems thinking."

Five Spheres Snapshot — built in one session:

Sphere	Signal
 Intellectual	Systems thinker, loves structured complexity
 Social	Facilitator energy — enables others to show up
 Action	Satisfaction from plan → execution → silent success
 Communication	Low-ego communicator
 Growth	Exploration mode — appropriate for Stage 1→2

"Oh wow. I never thought of 'organizing the fest' as a strength."

Demo F — The Tough One: Suresh's Reframe

2nd Year Civil · "I hate my branch. I was always into tech."

 SrujanaBuddy: "You're learning Python on your own, without anyone asking you to. That's self-directed learning. And 'the maths of how buildings are designed' — you know what field sits exactly at that intersection? Computational Civil Engineering. People in it write Python to simulate building stress, model earthquake impact, optimize structural design."

What SrujanaBuddy did NOT do:

- ❌ Did not tell him to "just study harder"
- ❌ Did not escalate unnecessarily
- ❌ Did not dismiss the branch mismatch

What it DID:

- ✅ Wellbeing check first
- ✅ Reframed the branch — not wrong, just wrong frame
- ✅ Specific career path: Computational Civil + BIM + Digital Twins

6 AI Engineer Career Pathways

Already built into SrujanaBuddy — ready to deploy

graph TD; ASSESS["5-Question Self-Assessment"] --> P1["Pathway 1\nAI-Native Builder\n6–9 months"]; ASSESS --> P2["Pathway 2\nAI Systems Engineer\n9–15 months"]; ASSESS --> P3["Pathway 3\nData Science & Analytics\n6–9 months"]; ASSESS --> P4["Pathway 4\nML Research Analyst\n12–18 months"]; ASSESS --> P5["Pathway 5\nAI Product Leader\n4–6 months"]; ASSESS --> P6["Pathway 6\nAI Security & Governance\n9–12 months"];

```
style ASSESS fill:#1a237e,color:#fff
style P1 fill:#e3f2fd,color:#000

style P4 fill:#fce4ec,color:#000
style P5 fill:#f3e5f5,color:#000
style P6 fill:#ffccbc,color:#000
```

48 modules · 8 categories · evidence-based progression · free audit resources

Part 3: What SrujanaBuddy Delivers

For Students

graph LR S["Student\n'I need help'"] --> B["SrujanaBuddy\nAvailable 24/7"] B --> W["Wellbeing
check\nbefore task work"] B --> G["Personalized\nweekly coaching"] B --> P["Portfolio
&\ncompetency tracking"] B --> C["Career pathway\nclarity"] B --> E["Enterprising skills\n& GCS
scoring"]

```
style S fill:#e3f2fd,color:#000
style B fill:#1a237e,color:#fff
```

- **Always available** — 11 PM exam panic? Handled.
- **Culturally resonant** — Bangalore English, Kannada flavour, peer energy
- **Privacy-first** — consent-based sharing, student controls their data
- **Anti-substitution** — AI augments thinking; explain-back rule enforced

For Faculty

Before SrujanaBuddy	After SrujanaBuddy
Repetitive "where to start" questions	Students arrive with a plan
No visibility until exam failures	Early warning dashboard signals
60 students, 30 minutes each = impossible	AI handles routine; faculty handle advanced
Mentoring minutes undocumented	Structured session logs (consent-based)
Subject coaching bottleneck	10+ course coaches available per semester

 INFOGRAPHIC PLACEHOLDER: Faculty time freed up → deep mentoring, research collaboration

For REVA as an Institution

mindmap root((REVA Advantage)) Differentiation AI-native student experience Visible Srujana pathway evidence Portfolio-first graduates Mission Alignment Educate to Enterprise Panchakosha holistic development Indian wisdom tradition anchored Measurability GCS scores and progression Competency evidence collection At-risk early warning signals Scalability Markdown-native — no new infra Internal open source model Faculty as contributors

Privacy, Safety & Guardrails

flowchart TD
CHECK["Wellbeing Signal Detected"] --> L1["Tier 1 — Light coaching\nStudent briefly off\nHandle within session"]

L2 --> L3["Tier 3 — Escalation\nCrisis language detected\nImmediate faculty + Manodhara referral"]

```
style CHECK fill:#283593,color:#fff  
style L1 fill:#c8e6c9,color:#000  
style L2 fill:#fff9c4,color:#000  
style L3 fill:#ffcdd2,color:#000
```

- **Student controls sharing** — 3 tiers of mentor visibility
- **Consent-based leaderboards** — opt-in only
- **Anti-brain-rot rule** — AI never writes essays or code for submission
- **Explain-back requirement** — student must be able to explain AI-assisted output

The Numbers

Metric	Value
Files in system	~160
Lines of coaching intelligence	~15,000
Specialist agents	15
AI Engineer pathways	6
Demo student personas	10
Domains covered	Learning · Career · Life Skills · Wellbeing · Enterprise
Infrastructure required	None — runs on existing IDE + GitHub
New software to install	None

MEME PLACEHOLDER: "No new servers. No new licenses. Just a text file that makes the AI brilliant." (Suggest: "We have technology at home" meme — the technology is already here)

What Makes SrujanaBuddy Different

quadrantChart title Coaching Solutions Comparison x-axis Scalable --> Personalised y-axis Generic --> REVA-Specific quadrant-1 Ideal Zone quadrant-2 Generic & Personalised quadrant-3 Generic & Scalable quadrant-4 Specific but Limited SrujanaBuddy: [0.85, 0.9] Generic Chatbot: [0.9, 0.1] Human Faculty: [0.1, 0.85] Commercial EdTech: [0.7, 0.3]
SrujanaBuddy occupies the ideal zone: scalable AND REVA-specific AND personalised.

Part 4: Action Planning

Beta Testers, Contributors & Next Steps

The Ask — Be Part of History

"The best way to predict the future is to create it." — Alan Kay

We are looking for:

Faculty Beta Testers (2–3 volunteers)

- Use SrujanaBuddy alongside your existing mentoring
- Provide weekly feedback on student outcomes
- Help identify subject-specific coaching gaps

Student Beta Testers (5–10 volunteers)

- Commit to weekly coaching sessions for one semester
- Share anonymized progress signals (with consent)
- Help evolve the system through real use

Faculty Contributors (1–2 per course)

How to Contribute — No Tech Skills Needed

flowchart LR F["Faculty / Student\nContributor"] --> C1["🗣️ Talk to SrujanaBuddy\nReport what works / what doesn't"] F --> C2["📝 Edit a Markdown file\nUpdate coaching scripts, question banks"] F --> C3["🏠 Build a Course Buddy\nCoaching spec for your subject"] F --> C4["📊 Review student signals\nValidate coaching recommendations"]

```
style F fill:#1a237e,color:#fff
style C1 fill:#e3f2fd,color:#000
style C2 fill:#e8f5e9,color:#000
style C3 fill:#fff9c4,color:#000
style C4 fill:#fce4ec,color:#000
```

*This is a Markdown-native system. If you can write an email, you can contribute.
The system lives on GitHub — every change is versioned, reviewed, and attributed.*

Rollout Roadmap

gantt title SrujanaBuddy Rollout Plan dateFormat YYYY-MM-DD section v1.5 (Now) General coaching live :done, 2026-05-14, 2026-05-31 10 AI Engineer pathways :done, 2026-05-14, 2026-05-31 Demo & feedback loop :active, 2026-05-14, 2026-06-30

section v1.6 (Q3 2026)		
Faculty beta cohort (3 faculty)	:	2026-06-01, 2026-07-31
Student beta cohort (10 students)	:	2026-06-01, 2026-07-31
Course Buddy instances (3 courses)	:	2026-07-01, 2026-08-31
section v2.0 (Q4 2026)		
Faculty dashboards	:	2026-09-01, 2026-11-30
GCS leaderboard (opt-in)	:	2026-09-01, 2026-11-30
REVA-wide rollout consideration	:	2026-10-01, 2026-12-31

Identify 2–3 Courses for v1.6

Course Type	Why It Fits	Effort
Capstone Project	Students need ongoing coaching, not one-off advice	Medium
Research Methods / Dissertation	Structured guidance is repeatable and scalable	Medium
Internship Prep	Clear milestones, portfolio checkpoints, placement coaching	Low
AI/ML Foundation	Already have AI Engineer pathway modules built	Low
Life Skills / Soft Skills	Five Spheres framework maps directly	Low

Which courses would benefit most from 24/7 coaching support for your students?

Action Planning — Today's Commitments

Who	Action	By When
Faculty volunteers	Confirm beta testing interest	Today
Student nominees	Identify 5–10 beta testers	This week
Course selection	Nominate 2–3 courses for v1.6	This week
Core team	Schedule onboarding session	Next week
All	Share this presentation	Today — GitHub link

 IMAGE PLACEHOLDER: QR code linking to this presentation on GitHub (URL: [github.com/\[org\]/SrujanaBuddy/review/srujanabuddy-leadership-demo-v1.0.md](https://github.com/[org]/SrujanaBuddy/review/srujanabuddy-leadership-demo-v1.0.md))

Before We Open the Floor

Quick show of hands:

1. Which demo scenario did you find most relevant to your students?
2. Which T.R.A.C.K domain outside coaching interests you most?
(Teaching / Research / Administration / Consulting / Kaizen)
3. Who wants to be a beta tester — faculty or student nominator?

Your answers will shape v1.6 priorities.

Q&A

 IMAGE PLACEHOLDER: "No question is too basic" — open floor graphic

Anticipate these questions:

Question	Short Answer
"Is student data safe?"	Student-controlled, consent-based, no PII to external services
"Does it replace faculty?"	No — it handles routine so faculty handle advanced
"What if AI gives wrong advice?"	Faculty escalation triggers; all advice is explainable
"How much does it cost?"	Zero infrastructure cost — runs on existing tools
"Who maintains it?"	REVA contributors — internal open source model
"Is it ready now?"	15,000 lines live; demo logs validated; beta-ready

“

*"Education is not the filling of a pail,
but the lighting of a fire."*

— W.B. Yeats

SrujanaBuddy exists to light that fire —
one student, one session, one small win at a time.

Thank You
